About Me

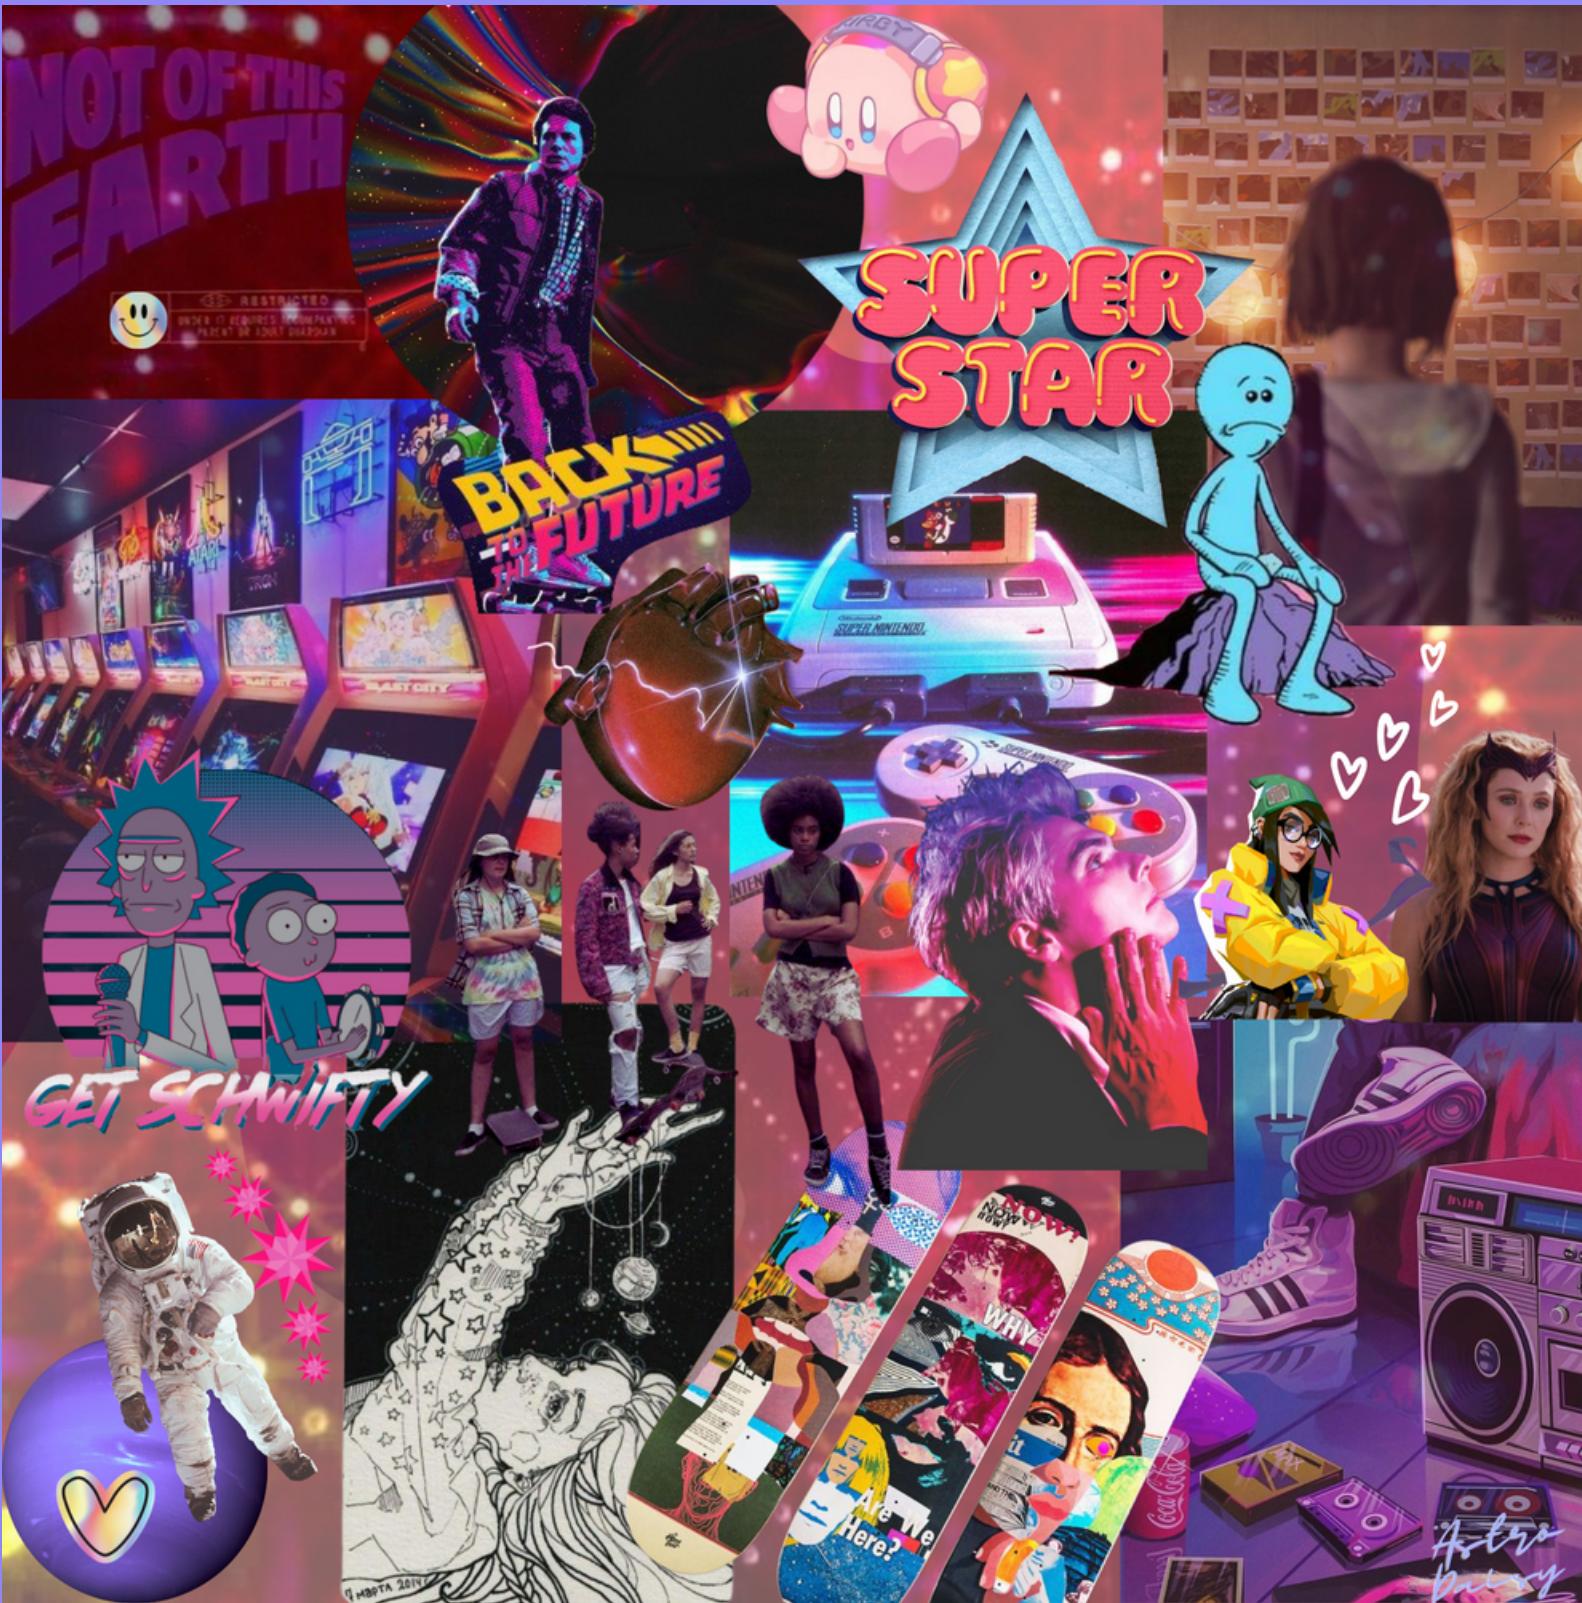

I, (Sangeeta Lall), am an aspiring director/screenwriter and game designer. I love art, video games, films, and all things space related. My favorite genres are science fiction, mystery, and horror. My all time favorite film is Interstellar and my all time favorite series is Stranger Things. When it comes to video games Life is Strange is perfect in my eyes.

Aspirations

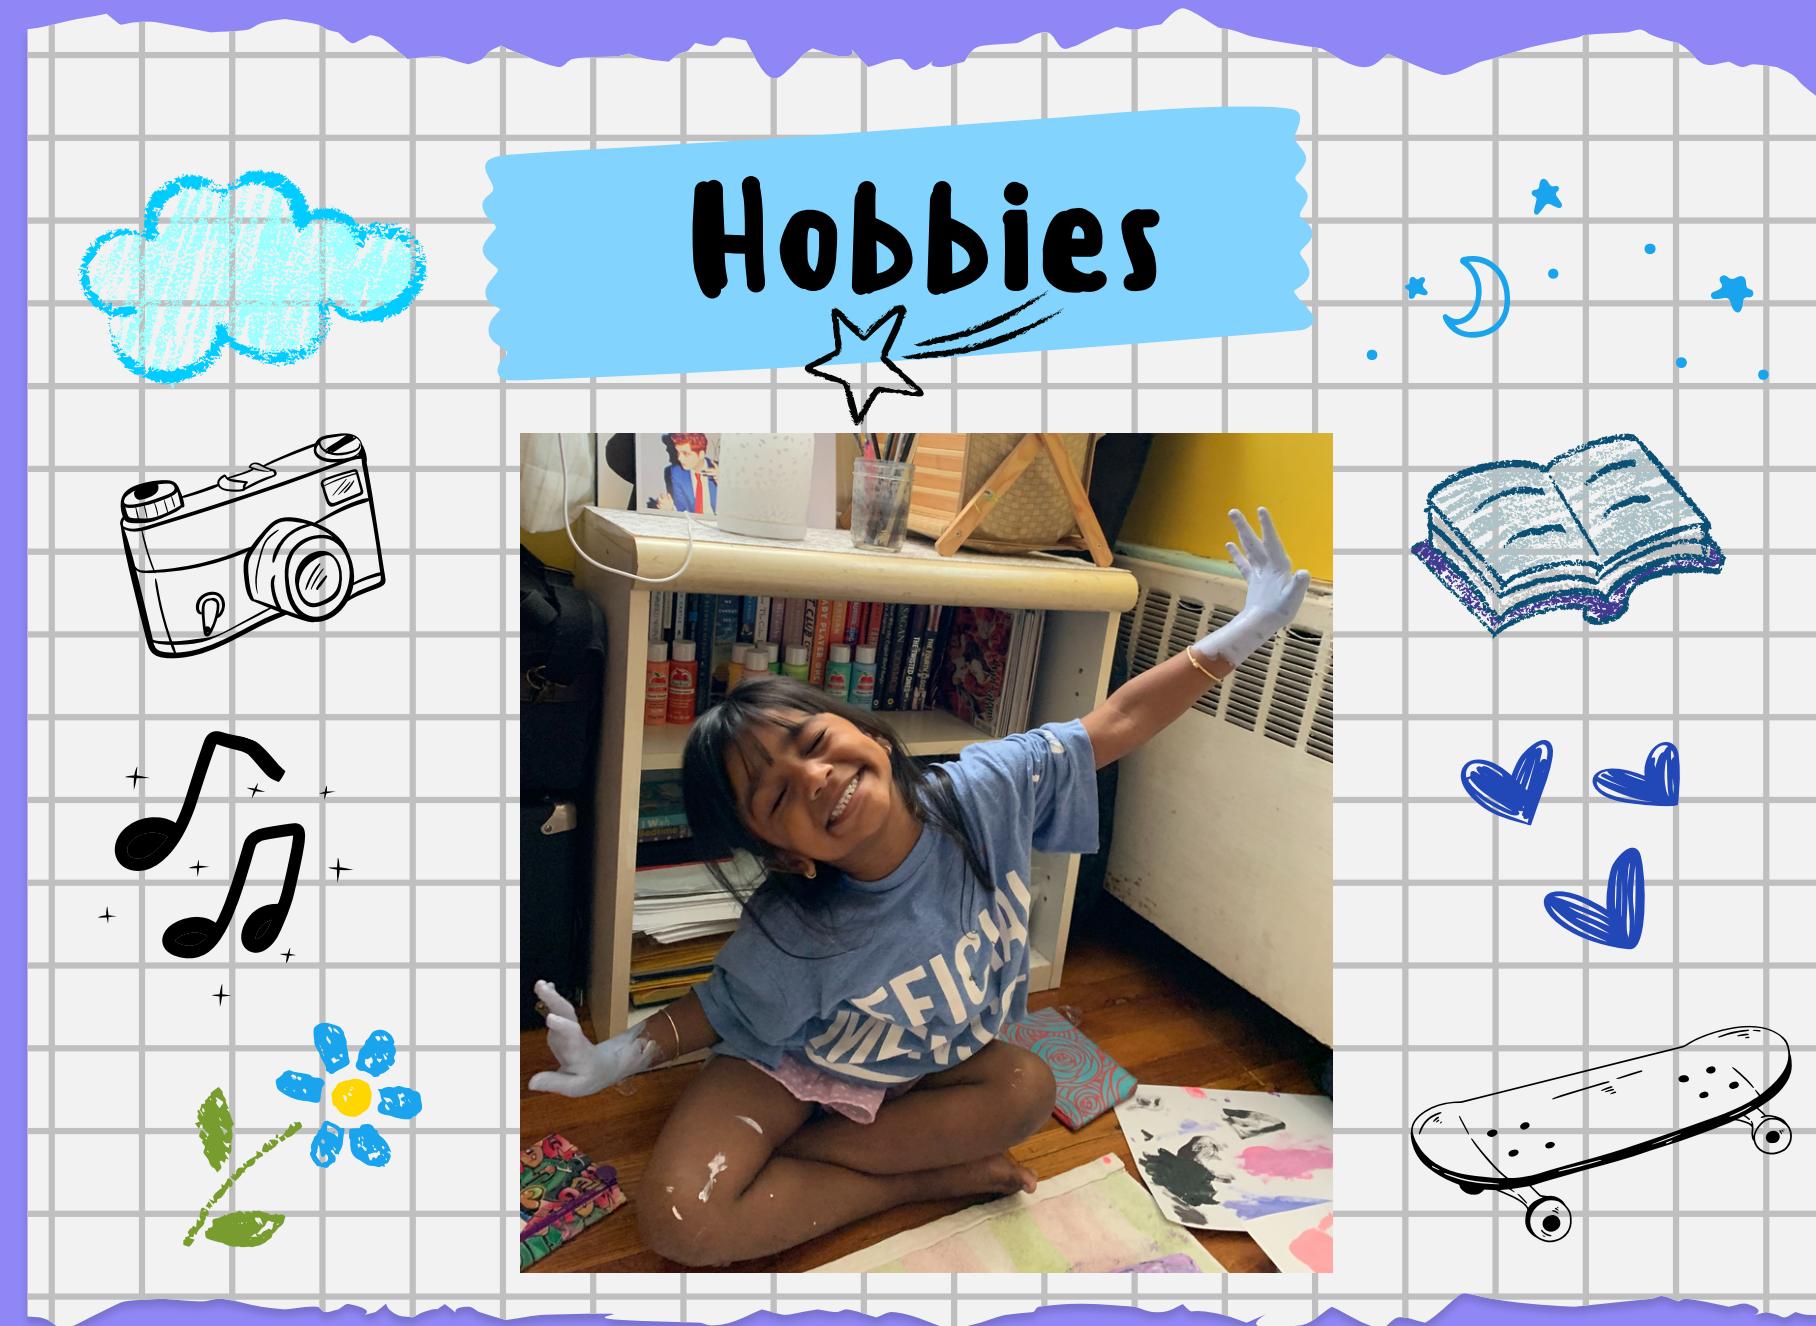

I am a junior at Hunter College majoring in film and minoring in emerging media. I hope to one day write and direct a feature film. I love the feeling of watching a new movie in theaters and dissecting them. As an avid gamer I aspire to design my own game! I want to create a story rich and immersive space as these games and films have done for me. I want to build a community of gamers and filmmakers.

Designs

This is a collage of things that I am interested in that I made for my Media 250 class.

Hobbies

I love spontaneously taking photographs with my DSLR, especially of my nieces and nephews. I also like to read books, my favorite being Looking for Alaska. I enjoy drawing and doodling. When I am not being creative I enjoy building PCs for my friends. You can usually find me outside with my skateboard or singing my heart out at a concert.

My Films
